

## Cloud Design Services

### Agile IT approach improves cost containment, productivity, and time-to-market

It's widely reported that 70% of an organization's IT investments are focused on maintenance, leaving little time to address strategic business initiatives that support organizational growth. With users demanding faster response time and management demanding lower costs, you need to explore new IT strategies to remain competitive in your market. Cloud Computing has emerged to reduce the complexity of IT by leveraging the efficient pooling of an on-demand, self-managed virtual infrastructure that supports the ebb and flow of normal business activity. Google and Amazon have both adopted cloud computing early on—and benefiting ever since. With the increased pressure on CIO's to do more with less, the promise of rapid, pay-as-you-go scalability has become a reality.

### Anexinet Experience

Anexinet's follows a pragmatic approach to accelerate realized value from Cloud Computing, helping to reduce the risks associated with the transformation. Anexinet's experience and client opportunities include:

- **Private Cloud Operational Readiness Assessment**—Receive detailed analysis of your existing IT environment and gain recommendations on how to “get ready for cloud.”
- **Private Cloud PAD Services (Plan, Assess, and Design)**—Deliver a shared IT services model using an Infrastructure as a Service (IaaS) methodology.
- **Private Cloud Deployment Services**—Gain the required data to make technology decisions to deploy your private cloud.
- **Hybrid Cloud Management and Integration Services**—Utilize a standards-based management framework for consolidating management of your cloud resources.
- **Cloud Provider Service Contracts**—Leverage standard Service Level Agreements (SLAs) to ensure that your IT resources are readily available.

### Anexinet Expertise

Anexinet helps clients deploy a virtualized infrastructure to create a Private Cloud for increased IT agility—all while leveraging your existing IT investments and preserving your choice. Our insights and delivery capabilities in your Cloud Computing strategies will provide:

- Reduced infrastructure and management costs
- Increased business agility through virtualized IT assets
- Confidence in maintaining your data security
- Deliver existing applications and services to users with defined service-levels more rapidly, shifting the focus from maintaining legacy systems to delivering innovation
- Improved compliance and control inside your firewall, built on the industry's most trusted virtualization platforms
- Transparency to the efficiencies in resource utilization and automation without impacting your SLAs and existing applications

### Where Leading-Edge Technology Meets Competitive Advantage

Anexinet, a premier systems integrator and technology management company uses proven and innovative ways to reduce operational costs, improve system performance, and better support your business—backed by more than 20 years of experience.

Anexinet offers application outsourcing, business intelligence (BI) & data solutions, and infrastructure services to mid-size and Fortune 1000 companies, associations, and government agencies.

Anexinet's experienced consultants ensure the success of clients' solutions through the company's Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company's innovation centers, client service model, and strategic product sourcing.

Anexinet's Near-Site® Development Centers enable project teams to design, develop and test client solutions within minutes of a client's location, and without disrupting current systems and organization.

Headquartered in Greater Philadelphia, Anexinet serves clients from offices and Near-Site® Development Centers located in the Northeast and Mid-Atlantic regions.
