

Cloud Platform Solutions

Agile IT approach improves cost containment, productivity, and time-to-market

70% of IT investments are focused on maintenance, leaving little time to address strategic business initiatives that support organizational growth. Users are demanding faster response times. Management is demanding lower costs and to do more with less. With Cloud Computing, your organization will reduce the complexity of IT to help you remain competitive with an on-demand infrastructure to serve your most critical application needs. Cloud Platform Solutions by Anexinet help clients gain the promise of rapid, pay-as-you-go scalability through managed clouds, secure hosting, and disaster recovery planning. We leverage enterprise-class virtualization, servers, storage, and a wide-area network (WAN) with top tier datacenter facilities. Our cloud solution considerably saves money on capital expenses and improves service levels over legacy, on-premise solutions.

Anexinet Experience

Anexinet delivers a full service “Private Cloud” that is competitively priced with the do-it-yourself black box cloud providers that leave you wondering, “where is my data?”

- Cloud Virtual Recovery**—Use a combination of virtualization, storage, and smart replication technologies to achieve operational efficiencies and protect critical systems at a fraction of the cost of traditional recovery solutions.

- Cloud Virtual Hosting**—Achieve operational efficiencies 10x the service levels at a fraction of the legacy cost with Virtual Datacenter (VDC) and Virtual Rack Equivalent (VRE) technologies.

Where Leading-Edge Technology Meets Competitive Advantage

Anexinet, a premier systems integrator and technology management company uses proven and innovative ways to reduce operational costs, improve system performance, and better support your business—backed by more than 20 years of experience.

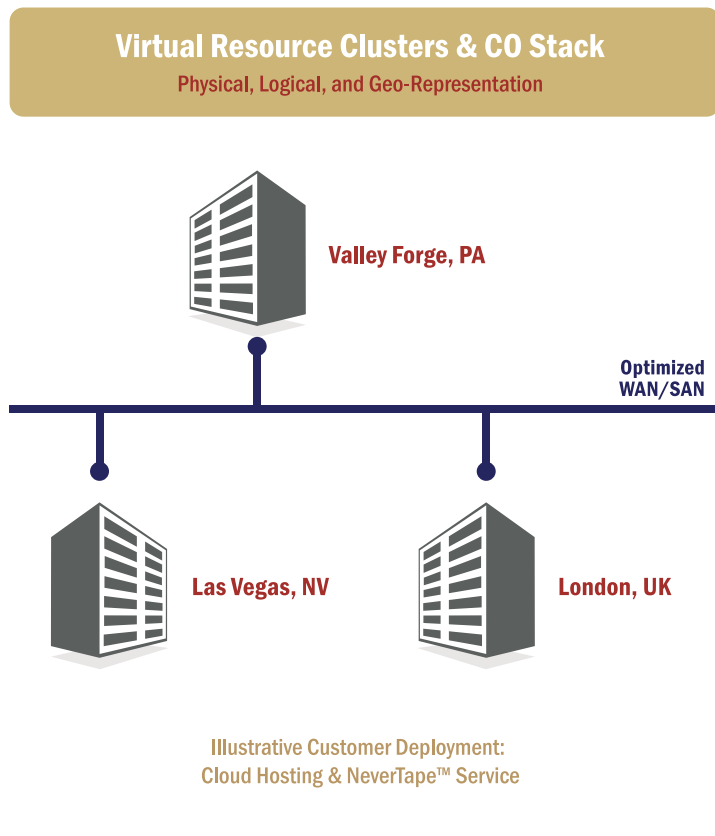

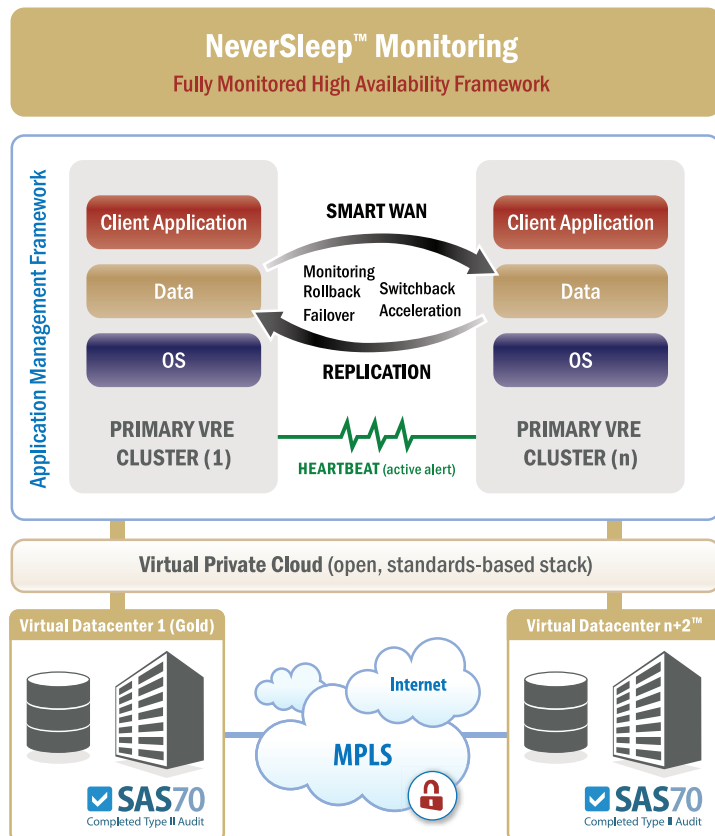

Anexinet offers application outsourcing, business intelligence (BI) & data solutions, and infrastructure services to mid-size and Fortune 1000 companies, associations, and government agencies.

Anexinet’s experienced consultants ensure the success of clients’ solutions through the company’s Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company’s innovation centers, client service model, and strategic product sourcing.

Anexinet’s Near-Site® Development Centers enable project teams to design, develop and test client solutions within minutes of a client’s location, and without disrupting current systems and organization.

Headquartered in Greater Philadelphia, Anexinet serves clients from offices and Near-Site® Development Centers located in the Northeast and Mid-Atlantic regions.

Multi-Datcenter Model for High Availability

Why Anexinet?

Anexinet provides a services and products portfolio that aligns IT with your business objectives.

We offer an innovative solutions delivery model and process methodology proven successful in client engagements.

In every client engagement, Anexinet seeks clear understanding of needs, open communication of competencies, and a best-fit solution strategically planned and implemented through unfettered collaboration and partnership.

We make it easy for people to do business with us.

Advanced Cloud Platform Options

On-Demand Cloud Infrastructure

Includes standard features not often available from other cloud providers:

- **Customer Support Center.** Staffed by senior engineers managing customer's infrastructure 24x x365 utilizing a variety of access options, including Customer Portal, E-mail, and Phone
- **Account Management.** Provides a single point of contact and quarterly contract reviews
- **Continuous Monitoring of CPU, Memory, Disk, and Network.** Includes predictive resource consumption analysis and monitoring of custom synthetic transactions
- **Critical Performance Measures.** Includes SLAs for 100% Recovery and 99.999% Availability (unplanned downtime), RTO of 4 hours, and RPO with prior day replication and 1 week of archive
- **Monthly Status Report.** Includes SLA performance metrics, trending, and Support Center activity
- **External Audit.** Includes annual SAS 70 Type II report

Advanced Performance & Reliability

- Virtual machine replication from customer premise to Anexinet cloud
- Utilization of the Anexinet Cloud Appliance (ACA) for monitoring, alerting, and advanced DR disaster recovery solutions
- WAN acceleration appliances that can dramatically increase application performance while lowering bandwidth requirements
- Multi-datcenter high availability replication of virtualized servers for the most critical workloads

Packaged Private Cloud Solutions

- Anexinet offers standard configurations for common IT cloud demands including Microsoft Exchange™, Microsoft Sharepoint™, and SAP™
