

Corporate Performance Management Solutions

Where Leading Edge Technology Meets Competitive Advantage

Anexinet, a premier solutions integrator applies leading-edge technology to complex business challenges to simplify business processes, strengthen IT organizations and provide competitive advantage.

Anexinet offers application development, integration, business intelligence, technology infrastructure and enterprise program management (EPM) services to mid-size and Fortune 1000 companies, associations and government agencies.

Anexinet's experienced consultants ensure the success of clients' solutions through the company's Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company's innovative S.A.F.E.-T²™ software delivery model. S.A.F.E.-T² is a project execution strategy and trademark approach based on the Project Management Institute (PMI®) methodology and Incremental Life Cycle Development standards.

Anexinet Near-Site™ Development Centers enable project teams to design, develop and test client solutions within minutes of a client's location, and without disrupting current systems and organization.

Headquartered in Philadelphia, Pa., Anexinet has regional offices throughout the Delaware Valley and metropolitan New York City and Washington, D.C. areas.

Gain enterprise visibility into business process systems and data for more agile strategic planning and decision-making.

Today, companies leverage data accumulated from their business systems for gauging how they are against goals set by senior management. However, they increasingly need real-time information to monitor business performance; quickly identify problem areas in operations; and make timely decisions on a daily basis to increase profit, revenue, and market share. Knowing where you are is not enough. Being able to leverage real-time business system data in gaining competitive advantage is a differentiator. Corporate Performance Management (CPM) solutions provide the key to meeting these new challenges. Planning and implementing CPM solutions however involve many nuances that, if overlooked or mishandled, can severely affect deployment time, costs, and effectiveness. To ensure successful initiatives, companies turn to Anexinet.

Anexinet Experience

Anexinet's CPM practice delivers best-fit, end-to-end solutions complete with client assessments, project planning, tool selection, implementation, Business Intelligence and Business Process Management integration, and optimization—for companies of any size. Our professionals draw on domain expertise from years of experience and excellence in critical areas of Corporate Performance Management such as:

- **Business Intelligence (BI) End-to-End Solutions**
- **BI Tool Evaluations** (like Hyperion, Microsoft, Business Objects, MicroStrategy, Cognos)
- **Business Process Management (BPM)**
- **Service-Oriented Architecture (SOA)**
- **BI Product Upgrades & Migrations**
- **Enterprise Reporting & Executive Dashboards**
- **Master Data Management**

Anexinet Expertise

Corporate performance management and business intelligence strategies demand careful planning, experienced business and technology teams, proven methodologies, and current industry insights. Years of industry focus and successful client engagements provide Anexinet's practice with rare domain expertise and valuable relationships with leading Corporate Performance Management, Business Process Management and Business Intelligence software vendors.

Different approaches can be taken to data reporting for CPM, depending on the type of organization, types of business systems, and business needs to be addressed. Anexinet's assessments of systems and processes identify where operational data is located and how to best leverage data with CPM visualization tools to achieve desired key performance indicators.

Organizations typically have difficulty choosing appropriate CPM tools. Many tools appear to offer similar capabilities. Anexinet's CPM practice shares valuable insights into the latest BPM and BI industry trends and technology to maximize an organizations investment. Clients use Anexinet's experience and relationships with all leading vendors to select and implement CPM, BPM and BI software and architecture that will meet objectives and budget while delivering highest long-term value.

Only with Anexinet do you gain an unbiased partner to manage all aspects of your corporate performance management and business intelligence initiatives. Our end-to-end solutions turn operational data into priceless intelligence for money-making and cost-saving decisions. Even in companies that have built data warehouses or data marts, Anexinet fills the significant needs to evaluate and optimize processes and to leverage BI and BPM capabilities into Corporate Performance Management solutions.

Delivering Real Value

“As a result of Anexinet’s solution, our fund administrators have been able to double the number of funds they support. This provides us with a real competitive edge.”

– VP, Mutual Fund Administration
SEI Investments

“Without Anexinet’s expertise and efficiency, our hardware, software and other expenses were estimated to go well over \$1 million. We spent only about 25% of that amount. That’s what I call ROI.”

– CIO
SPX Corporation

“No other firm we engaged has been able to deliver such a significant project on-time, on-budget and on-the-mark. Anexinet is superb at targeting your specific needs and tailoring a solution to meet those needs.”

– Manager, Infrastructure
Rohm & Haas

“Anexinet really listened to our need. Their people were true professionals - they communicated every step of the way and left us with a stronger internal team.”

– VP, Information Technology
Exelon Power Team

Proven and Pragmatic Approach with Tangible Deliverables

In every client engagement, Anexinet seeks clear understanding of needs, open communication of competencies, and a best-fit solution strategically planned and implemented through unfettered collaboration and partnership. To maximize success, Anexinet manages projects through its internal Program Management Office (PMO). The PMO of Anexinet provides for coordinated Enterprise Project Management (EPM) with real-time visibility, collaboration, and control from project inception through closure. Overall elements of Anexinet's approach include:

Project Elements	Project Deliverables
Orientation	<ul style="list-style-type: none"> • Kick-off engagement • In-depth discussion of the business and technical benefits of “process aware” Business Intelligence • Discuss Incremental path to implementation • BI/BPM deliverables discussed and mutually planned
Readiness Assessment	<ul style="list-style-type: none"> • Discovery and analysis of existing business processes and technology state • Collaborative discussions of findings, opportunities, and recommendations uncovered during analysis • Assessment and impact analysis documents • Identification of opportunities to demonstrate the value proposition via a targeted proof of concept
Proof of Concept	<ul style="list-style-type: none"> • Define scope and success criteria • Tool and infrastructure selection • Prototype realization • Presentation of results to project stakeholders • Roadmap for moving to a production implementation
Incremental Life Cycle Development	<ul style="list-style-type: none"> • Functional-requirement specifications • Architecture specification • Develop Multi Dimensional capabilities • Leveraging Built in Financial Intelligence • BPM with Integrated Process • Common Business Rules and Data • Project plan for iterative SDLC • Test plans • Reporting schematic layout of reports • Standard operating procedures • Knowledge transfer
