

Public Sector Solutions

Industry Forecasts

> IT services in the public sector will reach \$15 billion by 2008, up from \$10 billion at the end of this year. As private-sector companies shift back toward wanting innovation, those providers that focused on the public sector will have the advantage because of the leading-edge projects the US agencies commissioned in the past three years.

— Forrester Research 2007

Delivering Real Value

“The Anexinet solution enables the CPO to access project information in a more efficient manner, even when workloads increase...”

— Chris Donato, Deputy Director
Budget Management Group
Capital Program Office, City of Philadelphia

State, Local and Federal government agencies are faced with the continuous challenge of providing improved quality of service to their citizens with a limited amount of resources and tightly controlled budgets. Citizens today expect the same level of service that they receive from commercial industry companies, who do not have the same restrictions placed upon them. Public sector organizations need to be more flexible and be able to adapt to change as swiftly as possible in order to better serve their constituents.

By leveraging today's technology, public sector organizations can streamline their internal business processes, speed time-to-market of critical documents, and share and re-use information across departments to maximize workforce efficiency. Through a personalized and secure online presence, public sector organizations enable citizens with improved quality of “self-service” capabilities.

Anexinet, a leading provider of IT solutions to public sector organizations, not only provides Program and Strategy Management for major initiatives but can help improve business processes. Anexinet solutions consolidate disparate data across departments to provide employees with critical information to help them make quicker and better decisions. Anexinet has a proven track record of managing and delivering successful engagements with measurable ROI for its clients. As a Minority Business Enterprise Council (MBEC) Certification recipient, Anexinet provides proven IT consulting services to achieve MDBC mandates.

Example Solutions

Capital Budget Management Solution

- Improve system scalability and security to support multiple departments and volumes of data exchange
- Automate the approval processes for budgeting, allocations and payment
- Provide activity-based workflow to increase efficiencies and improve collaboration

Case Management System

- Consolidate data sources into one centralized Case Management Database
- Automate the process of incoming data feeds for compliance with regulatory guidelines
- Improve usability for search and retrieval of case information
- Improve system availability and data accuracy

Business Process Re-engineering

- Automate daily tasks related to internal business processes
- Reduce processing time and data inaccuracies associated with manual entry
- Utilize electronic forms to replace paper-centric environment with computerized “search & retrieval” capabilities

Knowledge Management Portals

- Consolidate data sources into one central repository
- Provide single user interface for personalized and secure information access
- Ease of use and real-time reporting of key performance indicators
- Provide classroom, web-based and CD-ROM Training options to end users

**Where Leading Edge
Technology Meets
Competitive Advantage**

Anexinet, a premier solutions integrator applies leading-edge technology to complex business challenges to simplify business processes, strengthen IT organizations and provide competitive advantage.

Anexinet offers application development, integration, business intelligence, technology infrastructure and enterprise program management (EPM) services to mid-size and Fortune 1000 companies, associations and government agencies.

Anexinet's experienced consultants ensure the success of clients' solutions through the company's Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company's innovative S.A.F.E-T²™ software delivery model. S.A.F.E-T² is a project execution strategy and trademark approach based on the Project Management Institute (PMI®) methodology and Incremental Life Cycle Development standards.

Anexinet Near-Site™ Development Centers enable project teams to design, develop and test client solutions within minutes of a client's location, and without disrupting current systems and organization.

Headquartered in Philadelphia, Pa., Anexinet has regional offices throughout the Delaware Valley and metropolitan New York City and Washington, D.C. areas.

ANEXINET.COM

Anexinet Core Competencies

Enterprise Portals	Anexinet empowers organizations to quickly build and deploy Web portal systems that reduce operational costs, increase employee productivity, and strengthen relationships with customers, partners and vendors.
Service-Oriented Architecture (SOA)	Leverage your existing IT assets to enable repeatable business process, real-time information synchronization, data security, and higher efficiencies using Anexinet's standards-based, vendor agnostic approach.
Business Intelligence/ Data Warehousing	Use Anexinet to leverage data accumulated in your business systems to monitor performance, quickly identify operational problems, and make timely decisions from business intelligence dashboards refreshed daily to increase profit, revenue, and market share.
Infrastructure and Security	Anexinet assists companies with implementing, upgrading, optimizing and certifying secure corporate networks for long-term business and data security, disaster recovery, and business continuity.
Enterprise Project Management	The Anexinet Project Management Office (PMO) provides real-time visibility, insight, and control for keeping IT projects on track, in budget and aligned with strategic objectives, enabling management of entire IT project portfolios for true business value.
Business Process Management (BPM)	Anexinet's BPM solution automates the manually intensive and often paper-centric processes to improve the effectiveness of business systems and staff, competitive advantages, and business value from existing technology investments.
Enterprise Content Management (ECM)	Consolidate and synchronize information management for operational efficiency, security, and competitive advantage. Anexinet ECM enables organizations to streamline the capture, integration, and distribution of all business information including documents, e-mail, images, Web content and digital assets.

Custom Application Development & Integration Services

J2EE Capabilities

The Java 2 Enterprise Edition (J2EE) platform underpins robust enterprise business systems ranging from smaller departmental solutions to enterprise-wide deployments. Anexinet offers a proven track record of architecting and developing J2EE applications for Fortune 1000 and mid-size companies across a variety of industries.

Microsoft .NET Capabilities

Many customers leverage Anexinet's expertise as a Microsoft Gold Certified Partner to address near term challenges with long-term solutions using custom applications of Microsoft .NET Web Services technology to connect information, people, systems, and devices.

Microsoft SQL Server 2005 Capabilities

Leverage the full potential of Microsoft's next-generation data management platform to address a variety of challenges from productivity to business intelligence.

Microsoft® Dynamics™ Capabilities

Anexinet, an award-winning Tier 1 solutions provider and Microsoft Gold Partner, removes risks from large, complex Microsoft Dynamics implementations and improves delivery of smaller solutions as well.
