

Where Leading-Edge Technology Meets Competitive Advantage.

Company Overview

Industry Recognition

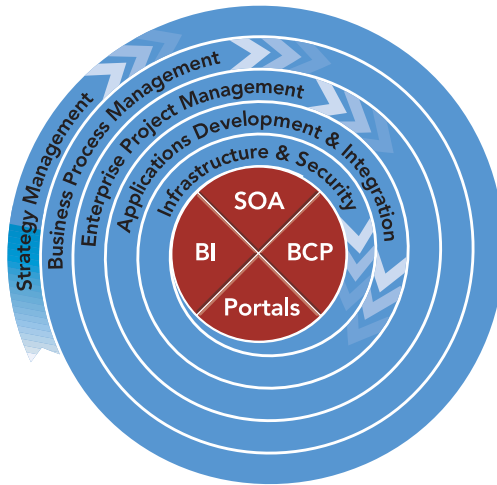

Anexinet has been honored with IBM's prestigious Lotus Beacon Award and counted among the Philadelphia 100[®] as one of the fastest growing privately held companies in the region. Anexinet was recently recognized with a Small Business Excellence Award and named Emerging Business of the Year by the Greater Philadelphia Chamber of Commerce.

Regional Excellence

An SBA-certified Small Disadvantaged Business (SDB), Anexinet serves clients across industry and government sectors. Representative clients include City of Philadelphia, Exelon, National Education Association (NEA), Radian Group, Rohm & Haas, SEI Investments and Towers Perrin.

Headquartered in Philadelphia, Pa., Anexinet has offices throughout the Delaware Valley and metropolitan New York City and Washington, D.C. areas.

Anexinet is a premier solutions integrator, value-added reseller and certified education center that enables IT organizations to respond to evolving business challenges quickly and cost-effectively. Serving mid-market to Fortune 1000 companies, associations and government agencies, Anexinet specializes in helping clients simplify business processes through implementation of Service-Oriented Architectures, Enterprise Portals, Business Intelligence, and Content Management Systems. The integrity and effectiveness of solutions are enhanced by expert planning and delivery methodologies developed by Anexinet for Strategy Management, Business Process Management, and Program Management Office for Enterprise Project Management.

Delivering Real Value

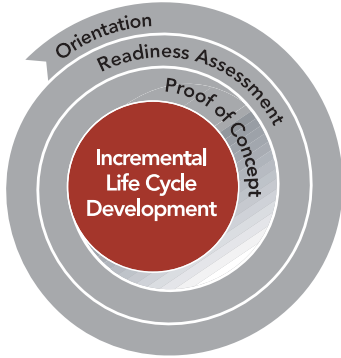

Anexinet automates business processes to improve operational performance, competitive advantages, and IT value with qualitative and quantitative return on investment. Solutions leverage the domain expertise of experienced consultants and business professionals, based on a proven delivery model based on more than 20 years of industry best practices.

Anexinet Approach

Client success is assured through interrelated innovations that define Anexinet's thought leadership in solutions delivery: Program Management Office (PMO), S.A.F.E-T²™ software delivery model, Near-Site™ Development Centers and best practices of both our software partners and client methodologies.

- **Program Management Office** provides consolidated real-time management for all aspects of solutions planning and delivery. Automated, client-focused enterprise project management keeps solutions on track, within time and budget, and aligned with client objectives.
- Anexinet's exclusive **S.A.F.E-T²™** software delivery model applies more than 20 years of collective best practices to rapidly design, develop and implement solutions. S.A.F.E-T² is a project methodology based on PMI standards and incremental life cycle development that enable project teams to provide consistently high quality, on-time deliverables - regardless of technology platform or industry.
- Anexinet **Near-Site™ Development Centers**, a unique component of the delivery model, enable project teams to design, develop and test solutions within minutes of a client's location, and without disrupting a client's current systems and organization.
- Anexinet combines **Software Partner Best Practices** from leading product manufacturers such as Microsoft, BEA, IBM, Oracle, and Metastorm with our client's project management methodologies to deliver efficient, results-oriented solutions.
- Anexinet requires its project managers to be **PMP® trained and certified** (Project Management Professional) by the Project Management Institute (PMI®).

Proven and Pragmatic Approach with Tangible Deliverables

In every client engagement, Anexinet seeks clear understanding of needs, open communication of competencies, and a best-fit solution strategically planned and implemented through unfettered collaboration and partnership.

To maximize success, Anexinet manages projects through its internal **Program Management Office (PMO)**.

The PMO of Anexinet provides for coordinated Enterprise Project Management (EPM) with real-time visibility, collaboration and control from project inception through closure.

Anexinet Solutions

Service-Oriented Architectures (SOA)

Anexinet integrates and automates repeatable business processes according to well-defined standards and enables processes to be triggered by specific business events. Anexinet addresses the principal areas of concern with SOA implementation including business systems interoperability, preservation of critical systems performance and data security during and after implementation, professional project management, time to implement, and costs.

Business Intelligence (BI)

Use Anexinet to automate analysis and delivery of data collected and stored throughout your organization. Business Intelligence tools enable sophisticated business reporting, activity monitoring, and linking dimensional data marts into an integrated system. Control business performance from desktop dashboards with graphic views of key performance indicators. Have data pushed directly to email, mobile phones and PDAs.

Enterprise Portal Technology

Anexinet's Business-to-Employee (B2E), Business-to-Business (B2B), Business-to-Customer (B2C) and Business Process portal solutions increase productivity, strengthen relationships, reduce costs and drive profits. Expert planning, management and implementation assure consistent, responsive on-line environments that users will want to rely on for information, collaboration, and on-line transactions. Integrated enterprise portal frameworks expedite business processes by updating multiple systems in a single transaction.

Business Continuity Planning (BCP)

Ensure your organization has an effective readiness plan for catastrophic interruption to business systems. Use Anexinet to help identify critical systems, assess vulnerabilities and business impact, implement disaster-recovery technologies, and train employees. With Anexinet, your business systems can become resilient and resistant to disaster situations.

Project Elements	Project Deliverables
Orientation	<ul style="list-style-type: none"> Engagement kick-off Bring Business and IT groups to a level playing field Clarity of approach and implementation process Deliverables discussed and mutually planned
Readiness Assessment	<ul style="list-style-type: none"> Consultative analysis of environment Assess approach already established or planned Develop strategy and optimize cost/benefit of approach
Proof of Concept	<ul style="list-style-type: none"> Identify project schedule Implement prototype Clarity of goals and objectives Track and monitor progress
Incremental Life Cycle Development	<ul style="list-style-type: none"> Establish internal Program Management Office Establish production environment Identify next set of projects or portfolio Load projects or portfolio into project management environment Train appropriate IT and business stakeholders Incrementally add portfolios with corresponding training
