

Business Process Management

Where Leading Edge Technology Meets Competitive Advantage

Anexinet, a premier solutions integrator applies leading-edge technology to complex business challenges to simplify business processes, strengthen IT organizations and provide competitive advantage.

Anexinet offers application development, integration, business intelligence, technology infrastructure and enterprise program management (EPM) services to mid-size and Fortune 1000 companies, associations and government agencies.

Anexinet's experienced consultants ensure the success of clients' solutions through the company's Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company's innovative S.A.F.E.-T²™ software delivery model. S.A.F.E.-T² is a project execution strategy and trademark approach based on the Project Management Institute (PMI®) methodology and Incremental Life Cycle Development standards.

Anexinet Near-Site™ Development Centers enable project teams to design, develop and test client solutions within minutes of a client's location, and without disrupting current systems and organization.

Headquartered in Philadelphia, Pa., Anexinet has regional offices throughout the Delaware Valley and metropolitan New York City and Washington, D.C. areas.

Optimize Complete Business Process Lifecycles Across Functional Business Units.

Historically, enterprise IT investments serve specific business functions and have been very narrowly defined—typically, not toward an enterprise's overall business strategy. Consequently, organizations lack a real-time holistic view of and control over enterprise operations. This lack of visibility and control can lead to stagnation in decision-making and business agility, making a company vulnerable to competitive forces and regulatory constraints. Leveraging Anexinet's vast experience in business consulting—Strategy Management, Business Intelligence, and Service-Oriented Architectures—our Business Process Management (BPM) solutions empower organizations to manage their IT and human resource systems to maximize revenue, minimize risk, and meet regulatory compliance challenges.

Anexinet Experience

Business executives, managers, and supervisors need real-time visibility and control across enterprise operations for competitive advantage, and to ensure regulatory compliance within their industries. To help organizations maximize their technology and human assets, Anexinet offers a full spectrum of BPM enablement services, including:

- **Readiness Assessments** with top-down focus on streamlining business processes
- **Process Mapping** with a robust modeling paradigm and clearly defined workflows
- **RFP Creation and Vendor Selection Tools** for best-fit business process management solutions
- **Proof of Concept and Full BPM Implementations** targeting low-impact, high-ROI processes within a company scaling to enterprise enablement
- **Business Process Integration Services** with interaction management and integration of legacy and component-based systems

Anexinet Expertise

Anexinet's BPM solutions provide the unifying layer to monitor and control human, transactional, and business intelligence data from a supervisor, manager, and executive view of enterprise activity. Our BPM enablers include:

- Separating process logic from applications that run the processes
- Creating process-based composite applications across existing systems
- Managing relationships among process participants
- Integrating resources (people, data, and applications)
- Identifying key performance indicators for effective real-time enterprise management

Our approach minimizes new software investments and focuses more on enterprise visibility and agility, specifically:

- **Business** visibility to understand what business processes and events comprise your core competencies and drive profitability
- **Operational** visibility to know who, what, where, when, and how processes and events interact and impact business activity
- **Financial** visibility to identify how processes and events contribute to costs, revenues, and any mandatory regulatory disclosures
- **Technology** visibility to expose key data, events, and processes across disparate sources, so that you can act in a timely manner and with the flexibility to seize competitive advantages
- **Governance** visibility so that corporate oversight and risk management can be easily enforced from dashboards with quick measurements, thresholds, and alerts

Delivering Real Value

“As a result of Anexinet's solution, our fund administrators have been able to double the number of funds they support. This provides us with a real competitive edge.”

– VP, Mutual Fund Administration
SEI Investments

“Without Anexinet's expertise and efficiency, our hardware, software and other expenses were estimated to go well over \$1 million. We spent only about 25% of that amount. That's what I call ROI.”

– CIO
SPX Corporation

“No other firm we engaged has been able to deliver such a significant project on-time, on-budget and on-the-mark. Anexinet is superb at targeting your specific needs and tailoring a solution to meet those needs.”

– Manager, Infrastructure
Rohm & Haas

“Anexinet really listened to our need. Their people were true professionals - they communicated every step of the way and left us with a stronger internal team.”

– VP, Information Technology
Exelon Power Team

Proven and Pragmatic Approach with Tangible Deliverables

In every client engagement, Anexinet seeks clear understanding of needs, open communication of competencies, and a best-fit solution strategically planned and implemented through unfettered collaboration and partnership. To maximize success, Anexinet manages projects through its internal Program Management Office (PMO). The PMO of Anexinet provides for coordinated Enterprise Project Management (EPM) with real-time visibility, collaboration, and control from project inception through closure. Overall elements of Anexinet's approach include:

Project Elements	Project Deliverables
Orientation	<ul style="list-style-type: none">• Kick-off engagement• Discussion of the benefits of BPM solutions• Discussion of BPM tool selection• Discussion of process mapping and prioritization
Readiness Assessment	<ul style="list-style-type: none">• Identification of existing business processes and technology state• Collaborative discussions of findings, opportunities, and recommendations uncovered during analysis• Assessment and impact analysis documents• Identification of process opportunities to develop a Proof of Concept BPM implementation
Proof of Concept	<ul style="list-style-type: none">• Scope statement and verification• BPM tool selection• Prototype development• Presentation of results to project stakeholders• Roadmap for enterprise implementation
Incremental Life Cycle Development	<ul style="list-style-type: none">• Define project scope and business objectives• Establish project requirements and assemble project team• Establish environments to support application life cycle propagation• BPM implementation<ul style="list-style-type: none">– Process modeling– Business process/Interface development– Analytics definition and development• Knowledge Transfer and Scope Validation

Anexinet's BPM solutions improve the effectiveness of business systems and staff. Without having to recode or replace existing software, enterprise performance stays optimized and aligned with strategic objectives and evolving market conditions. In addition to operational efficiencies, new capabilities to proactively monitor and control your business environment add significant competitive advantage and business value.
