

# Microsoft® SQL Server™ 2005 Capabilities

## Leverage Full Potential of Microsoft's Next-Generation Data Management Platform with Anexinet's Implementation Services and Business Intelligence Expertise.

Microsoft® SQL Server™ 2005 promises a comprehensive, next-generation data management platform with increased scalability, availability, and security of enterprise data and analytical applications. The Transaction Processing Performance Council (TPC)\* has benchmarked SQL Server 2005 at up to 162 percent higher performance than SQL Server 2000. Beta releases already empower users to leverage enterprise data and applications to drive revenue as never before possible. As a Microsoft partner staffed with professionals holding various Microsoft certifications, Anexinet has seized an inside track for SQL Server 2005 expertise. Our purpose: to educate customers and assist organizations with implementing and leveraging the new robust functionality for their specific business objectives.

### Anexinet Experience

In preparation for the launch of SQL Server 2005, Microsoft has been working with partners such as Anexinet. From a vantage point of hands-on experience with the beta product, Anexinet is positioned to not only provide feedback to Microsoft, but also share what we have learned with customers through services such as:

- SQL Server 2005 features/benefits education
- Installation, upgrade, and migration assessments
- Best practices for SQL Server 2005 deployment
- Business Intelligence enterprise reporting and executive dashboards

### Anexinet Expertise

An experienced Microsoft solution provider, Anexinet continues to evolve with Microsoft technology, enabling customers to better address a variety of business challenges. With SQL Server 2005, Anexinet customers will increase their enterprise data management, IT productivity and effectiveness, and business intelligence.

#### SQL Server 2005:

- Improves the scalability, availability, and security of enterprise data, applications, and associated services
- Reduces the complexity of building, deploying, and managing database applications

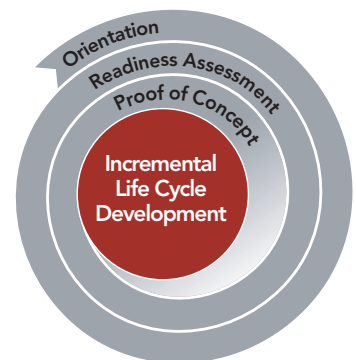

- Increases interoperability with existing systems and data sharing across multiple platforms, applications, and devices
- Extends the value of existing applications, regardless of their underlying platform
- Provides a complete business intelligence platform with comprehensive integration, analysis, and reporting capabilities
- Enables data administrators anywhere in an organization to manage and optimize databases and services from a single, integrated management console
- Consolidates and automates routine tasks, enabling IT staff to meet demands of business-driven decisions
- Lowers IT operational costs

#### Complimentary Half-Day Technical Evaluation and SQL Server 2005 Readiness Assessment:

Anexinet is positioned to help organizations upgrade to the lower-TCO SQL Server 2005 from SQL Server 7.0, SQL Server 2000, and Oracle. Understand potential improvements to your environment that SQL Server 2005 offers and the scope of implementation requirements. Contact your Anexinet Account Executive or visit us on-line to schedule your free technical evaluation and initial readiness assessment.

\*The TPC is an independent, non-profit corporation founded to define transaction processing and database benchmarks and to disseminate objective, verifiable performance data to the industry.

Proven and Pragmatic Approach with Tangible Deliverables

In every client engagement, Anexinet seeks clear understanding of needs, open communication of competencies, and a best-fit solution strategically planned and implemented through unfettered collaboration and partnership.

To maximize success, Anexinet manages projects through its internal Program Management Office (PMO).

The PMO of Anexinet provides for coordinated Enterprise Project Management (EPM) with real-time visibility, collaboration, and control from project inception through closure.
