

Enterprise Content Management Solutions

Where Leading Edge Technology Meets Competitive Advantage

Anexinet, a premier solutions integrator applies leading-edge technology to complex business challenges to simplify business processes, strengthen IT organizations and provide competitive advantage.

Anexinet offers application development, integration, business intelligence, technology infrastructure and enterprise program management (EPM) services to mid-size and Fortune 1000 companies, associations and government agencies.

Anexinet's experienced consultants ensure the success of clients' solutions through the company's Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company's innovative S.A.F.E.-T²™ software delivery model. S.A.F.E.-T² is a project execution strategy and trademark approach based on the Project Management Institute (PMI®) methodology and Incremental Life Cycle Development standards.

Anexinet Near-Site™ Development Centers enable project teams to design, develop and test client solutions within minutes of a client's location, and without disrupting current systems and organization.

Headquartered in Philadelphia, Pa., Anexinet has regional offices throughout the Delaware Valley and metropolitan New York City and Washington, D.C. areas.

Consolidate and Synchronize Information Management for Operational Efficiency, Security, and Competitive Advantage.

Enterprise Content Management (ECM) enables organizations to streamline the capture and distribution of all business information including documents, e-mail, images, Web content, and digital assets. Users easily create, review, approve, and publish any piece of content from a central repository with automated business processes that ensure regulatory compliance and secure information access. Anexinet ECM solutions leverage industry partnerships with leading applications providers, proven capabilities in all required technology disciplines, and best-practices project management methodologies for complex implementations.

Anexinet Experience

ECM solutions from Anexinet empower clients to:

- Reduce information management costs
- Reuse content for speed to market and enterprise-wide consistency
- Unify disparate data repositories
- Eliminate data redundancies through content versioning
- Enforce corporate IT governance standards, with user security, business workflows, audit logs, and data archiving for quick retrieval and on-demand reporting
- Increase real-time visibility into enterprise information processes with executive dashboards
- Provide business users with self-directed control of job-specific content

Anexinet Expertise

As a leading solutions integrator, Anexinet brings hands-on experience with all content management system disciplines at the core of ECM.

- Document creation, management, and publishing
- Records management
- Digital assets management, including Web content, audio, video, logos, and code
- Email management
- Data backup and recovery

An Anexinet ECM solution includes assistance with selecting the most-appropriate products to address your specific needs. Complementary Anexinet capabilities facilitate a more-effective ECM deployment:

- **Service-Oriented Architecture (SOA)** technology integrates ECM across legacy, component-based and proprietary applications to elevate the value of your prior IT investments through new levels of systems interoperability.
- **Enterprise Portals** enable personalized online workspaces for Web-based communication, collaboration, and document sharing from the central data repository that your Anexinet ECM solution provides.
- **Business Intelligence** transforms your data into timely information that can be used for competitive advantage and continuing business-process improvement.
- **Security technologies** ensure protection of your corporate systems beyond the ECM solution.
- **IT Infrastructure** improvements, in addition to the above, upgrade IT performance and Business Continuity Planning.
- **Anexinet's Program Management Office (PMO)** protects your investment with a sophisticated Enterprise Project Management (EPM) methodology that ensures successful implementation within time and budget.

Delivering Real Value

“As a result of Anexinet's solution, our fund administrators have been able to double the number of funds they support. This provides us with a real competitive edge.”

– VP, Mutual Fund Administration
SEI Investments

“Without Anexinet's expertise and efficiency, our hardware, software and other expenses were estimated to go well over \$1 million. We spent only about 25% of that amount. That's what I call ROI.”

– CIO
SPX Corporation

“No other firm we engaged has been able to deliver such a significant project on-time, on-budget and on-the-mark. Anexinet is superb at targeting your specific needs and tailoring a solution to meet those needs.”

– Manager, Infrastructure
Rohm & Haas

“Anexinet really listened to our need. Their people were true professionals - they communicated every step of the way and left us with a stronger internal team.”

– VP, Information Technology
Exelon Power Team

Proven and Pragmatic Approach with Tangible Deliverables

In every client engagement, Anexinet seeks clear understanding of needs, open communication of competencies, and a best-fit solution strategically planned and implemented through unfettered collaboration and partnership. To maximize success, Anexinet manages projects through its internal Program Management Office (PMO). The PMO of Anexinet provides for coordinated Enterprise Project Management (EPM) with real-time visibility, collaboration, and control from project inception through closure. Overall elements of Anexinet's approach include:
