

Performance Management Solutions

Equip decision makers across your enterprise with critical information

Every organization strives to make their operations more efficient—at the same time deliver a high level of customer satisfaction. But most have limited or no capability to properly track and measure their IT investments with business goals—whether assessing the performance of your overall organization, an individual employee, or perhaps a specific business process. By managing the performance of your employees or your information systems, you can help effectively deliver strategic and operational goals. There is a clear and immediate correlation between using performance management tools and improved business results, risk mitigation, and results yielded from operational efficiencies.

Anexinet Experience

Anexinet's experience and client opportunities for Performance Management solution include:

- **Assessment**—Anexinet uses a comprehensive assessment as a first step towards forming an effective Performance Management monitoring and analysis platform. We will analyze your business environment, organize your stakeholders, source your systems and data elements, and provide viable ROI information on Performance Management benefits to your company.
- **Proof of Concept**—Utilizing our Blue Bell, Pa-based Innovation Center, Anexinet delivers fully functional Performance Management Proof of Concepts using a subset of your own data. We will install and configure a secure environment to demonstrate a real Performance Management solution. Once accepted by your stakeholders, the Proof of Concept is moved to your facility for further work.
- **Deployments**—Anexinet brings proven leadership and technical capabilities to deliver full lifecycle software development around the Performance Management solution that helps determine your candidate data, develop your models and rules, and improve your workflow and data distribution.

Anexinet Expertise

Anexinet utilizes the Microsoft® Business Intelligence toolset—based on SQL Server—to deliver a robust Performance Management solution that meets the goal of increasing business performance and identifying risks and opportunities. Our solutions provide:

- Secure, web-based access to data and analytics
- Feature-rich data exploration
- Intelligent, meaningful visualizations

Sample Outputs:

Where Leading-Edge Technology Meets Competitive Advantage

Anexinet, a premier systems integrator and technology management company uses proven and innovative ways to reduce operational costs, improve system performance, and better support your business—backed by more than 20 years of experience.

Anexinet offers application outsourcing, business intelligence (BI) & data solutions, and infrastructure services to mid-size and Fortune 1000 companies, associations, and government agencies.

Anexinet's experienced consultants ensure the success of clients' solutions through the company's Program Management Office (PMO), a pragmatic approach that combines industry best practices experience with the company's innovation centers, client service model, and strategic product sourcing.

Anexinet's Near-Site® Development Centers enable project teams to design, develop and test client solutions within minutes of a client's location, and without disrupting current systems and organization.

Headquartered in Greater Philadelphia, Anexinet serves clients from offices and Near-Site® Development Centers located in the Northeast and Mid-Atlantic regions.
